### 1. The Company and Significant Accounting Policies

These unaudited interim condensed consolidated financial statements have been prepared by the management of Idaho Strategic Resources, Inc. ("IDR", "Idaho Strategic" or the "Company") in accordance with accounting principles generally accepted in the United States of America for interim financial information. Accordingly, they do not include all the information and footnotes required by generally accepted accounting principles for complete consolidated financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair statement of the interim condensed consolidated financial statements have been included.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of the Company's consolidated financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions, which could have a material effect on the reported amounts of the Company's consolidated financial statements; of the results that may be expected for the full year ending December 31, 2024.

For further information refer to the financial statements and footnotes thereto in the Company's audited consolidated financial statements for the year ended December 31, 2023, in the Company's Form 10-K as filed with the Securities and Exchange Commission on March 25, 2024.

### **Principles of Consolidation**

The condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiary, the New Jersey Mill Joint Venture ("NJMJV"). Intercompany accounts and transactions are eliminated. The portion of entities owned by other investors is presented as non-controlling interests on the consolidated balance sheets and statements of operations.

### **Revenue Recognition**

*Gold Revenue Recognition and Receivables*-Sales of gold sold directly to customers are recorded as revenues and receivables upon completion of the performance obligations and transfer of control of the product to the customer. For concentrate sales, the performance obligation is met, the transaction price can be reasonably estimated, and revenue is recognized generally at the time of shipment at estimated forward prices for the anticipated month of settlement. Due to the time elapsed from shipment to the customer and the final settlement with the customer, prices at which sales of concentrates will be settled are estimated. Previously recorded sales and accounts receivable are adjusted to estimated settlement metals prices until final settlement by the customer. For sales of doré and metals from doré, the performance obligation is met, the transaction price is known, and revenue is recognized at the time of transfer of control of the agreed-upon metal quantities to the customer by the refiner.

Sales and accounts receivable for concentrate shipments are recorded net of charges by the customer for treatment, refining, smelting losses, and other charges negotiated with the customers. Charges are estimated upon shipment of concentrates based on contractual terms, and actual charges typically do not vary materially from estimates. Costs charged by customers include fixed costs per ton of concentrate and price escalators. Refining, selling, and shipping costs related to sales of doré and metals from doré are recorded to cost of sales as incurred. See Note 4 for more information on our sales of products.

Other Revenue Recognition-Revenue from harvest of raw timber is recognized when the performance obligation under a contract and transfer of the timber have both been completed. Sales of timber found on the Company's mineral properties are not a part of normal operations.

#### **Inventories**

Inventories are stated at the lower of full cost of production or estimated net realizable value based on current metal prices. Costs consist of mining, transportation, and milling costs including applicable overhead, depreciation, and amortization relating to the operations. Costs are allocated based on the stage at which the ore is in the production process. Supplies inventory is stated at the lower of cost or estimated net realizable value.

# Mine Exploration and Development Costs

The Company expenses exploration costs as such in the period they occur. The mine development stage begins once the Company identifies ore reserves which is based on a determination whether an ore body can be economically developed. Expenditures incurred during the development stage are capitalized as deferred development costs and include such costs for drift, ramps, raises, and related infrastructure. Costs to improve, alter, or rehabilitate primary development assets which appreciably extend the life, increase capacity, or improve the efficiency or safety of such assets are also capitalized. The development stage ends when the production stage of ore reserves begins. Amortization of deferred development costs is calculated using the units-of-production method over the expected life of the operation based on the estimated recoverable mineral ounces.

#### Fair Value Measurements

When required to measure assets or liabilities at fair value, the Company uses a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used. The Company determines the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Level 1 uses quoted prices in active markets for identical assets or liabilities, Level 2 uses significant other observable inputs, and Level 3 uses significant unobservable inputs. The amount of the total gains or losses for the period that are included in earnings are attributable to the change in unrealized gains or losses relating to those assets and liabilities still held at the reporting date. At December 31, 2023, the Company had equity securities measured at fair value using level 1 quoted prices and no liabilities required measurement at fair value. At March 31, 2024, the Company had no assets or liabilities that required measurement at fair value on a recurring basis.

### 1. The Company and Significant Accounting Policies (continued)

### Accounting for Investments in Joint Ventures ("JV") and Equity Method Investments

Investment in JVs-For JVs where the Company holds more than 50% of the voting interest and has significant influence, the JV is consolidated with the presentation of non-controlling interest. In determining whether significant influence exists, the Company considers its participation in policy-making decisions and its representation on the venture's management committee.

For JVs in which the Company does not have joint control or significant influence, the cost method is used. For those JVs in which there is joint control between the parties, the equity method is utilized whereby the Company's share of the ventures' earnings and losses is included in the statement of operations as earnings in JVs and its investments therein are adjusted by a similar amount. The Company periodically assesses its investments in JVs for impairment. If management determines that a decline in fair value is other than temporary it will write-down the investment and charge the impairment against operations.

*Equity Method Investments*-Investments in companies and joint ventures in which the Company has the ability to exercise significant influence, but do not control, are accounted for under the equity method of accounting. In determining whether significant influence exists, the Company considers its participation in policy-making decisions and representation on governing bodies. Under the equity method of accounting, our share of the net earnings or losses of the investee are included in net income (loss) in the consolidated statements of operations. We evaluate equity method investments whenever events or changes in circumstance indicate the carrying amounts of such investments may be impaired. If a decline in the value of an equity method investment is determined to be other than temporary, a loss is recorded in earnings in the current period. At March 31, 2024, and December 31, 2023, the Company's 37% common stock holding of Buckskin Gold and Silver, Inc. ("Buckskin") is accounted for using the equity method (Note 10).

At March 31, 2024 and December 31, 2023, the Company's percentage ownership and method of accounting for each JV and equity method investment is as follows:

	March 31, 2024			Dece	ember 31, 2023	
JV/Equity	% Ownership	Significant Influence?	Accounting Method	% Ownership	Significant Influence?	Accounting Method
NJMJV	65%	Yes	Consolidated	65%	Yes	Consolidated
Butte Highlands JV, LLC	50%	No	Cost	50%	No	Cost
Buckskin	37%	Yes	Equity	37%	Yes	Equity

### **Reclassifications**

Certain prior period amounts have been reclassified to conform to the 2024 financial statement presentation. Reclassifications had no effect on net loss, stockholders' equity, or cash flows as previously reported.

### Investments in Equity Securities

Investments in equity securities are generally measured at fair value. Unrealized gains and losses for equity securities resulting from changes in fair value are recognized in current earnings. If an equity security does not have a readily determinable fair value, we may elect to measure the security at its cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for an identical or similar investment in the same issuer. At the end of each reporting period, we reassess whether an equity investment security without a readily determinable fair value qualifies to be measured at cost less impairment, consider whether impairment indicators exist to evaluate if an equity investment security is impaired and, if so, record an impairment loss. At the end of each reporting period, unrealized gains and losses resulting from changes in fair value are recognized in current earnings. Upon sale of an equity security, the realized gain or loss is recognized in current earnings.

### NewAccounting Pronouncement

In August 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2023-05, Business Combinations-Joint Venture Formations (Subtopic 805-60): Recognition and Initial Measurement, which clarifies the business combination accounting for joint venture formations. The amendments in the ASU seek to reduce diversity in practice that has resulted from a lack of authoritative guidance regarding the accounting for the formation of joint ventures in separate financial statements. The amendments also seek to clarify the initial measurement of joint venture net assets, including businesses contributed to a joint venture. The guidance is applicable to all entities involved in the formation of a joint venture. The amendments are effective for all joint venture formations with a formation date on or after January 1, 2025. Early adoption and retrospective application of the amendments are permitted. We do not expect adoption of the new guidance to have a material impact on our consolidated financial statements and disclosures.

In November 2023, the FASB issued ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures, amending reportable segment disclosure requirements to include disclosure of incremental segment information on an annual and interim basis. Among the disclosure enhancements are new disclosures regarding significant segment expenses that are regularly provided to the chief operating decision-maker and included within each reported measure of segment profit or loss, as well as other segment items bridging segment revenue to each reported measure of segment profit or loss. The amendments in ASU 2023-07 are effective for fiscal years beginning after December 15, 2023, and for interim periods within fiscal years beginning after December 15, 2024, and are applied retrospectively. Early adoption is permitted. We are currently evaluating the impact of this update on our consolidated financial statements and disclosures.

In December 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvement to Income Tax Disclosures, amending income tax disclosure requirements for the effective tax rate reconciliation and income taxes paid. The amendments in ASU 2023-09 are effective for fiscal years beginning after December 15, 2024 and are applied prospectively. Early adoption and retrospective application of the amendments are permitted. We are currently evaluating the impact of this update on our consolidated financial statements and disclosures.

Management does not believe that any other recently issued, but not yet effective, accounting standards if currently adopted would have a material effect on the accompanying financial statements.

## 2. Going Concern

The Company is currently producing profitably from underground mining at the Golden Chest Mine. In the past, the Company has been successful in raising required capital from sale of common stock, forward gold contracts, and debt. As a result of its profitable production, equity sales and potential debt borrowings or restructurings, management believes cash flows from operations and existing cash are sufficient to conduct planned operations and meet contractual obligations for the next 12 months.

### 3. Inventories

At March 31, 2024 and December 31, 2023, the Company's inventories consisted of the following:

	March 31, 2024	December 31, 2023
Concentrate inventory		
In process	\$ 110,526	\$ 28,778
Finished goods	31,784	239,361

### 4. Sales of Products

Our products consist of both gold flotation concentrates which we sell to a single broker (H&H Metals), and an unrefined gold-silver product known as doré which we sell to a precious metal refinery. At March 31, 2024, metals that had been sold but not finally settled included 5,737 ounces of which 4,421 ounces were sold at a predetermined price with the remaining 1,316 exposed to future price changes. The Company has received provisional payments on the sale of these ounces with the remaining amount due reflected in gold sales receivable. Sales of products by metal type for the three-month periods ended March 31, 2024 and 2023 were as follows:

Marah 21

	IVIA	Iviarcii 51,

Total	\$ 5,898,938	\$	3,341,596		

Sales by significant product type for the three-month periods ended March 31, 2024, and 2023 were as follows:

	Marc	ch 31	,
	2024		2023
Concentrate sales to H&H Metal	\$ 5,898,938	\$	3,203,491
Dore sales to refinery	-		138,105
Total	\$ 5,898,938	\$	3,341,596

At March 31, 2024 and December 31, 2023, our gold sales receivable balance related to contracts with customers of \$1,238,474 and \$1,038,867, respectively, consist only of amounts due from H&H Metals. There is no allowance for doubtful accounts.

### 5. Related Party Transactions

At March 31, 2024 and December 31, 2023, there were no notes payable to related parties. On May 10, 2023, the Company paid the remaining amount due to Ophir Holdings, a company owned by two officers and one former officer of the Company. Prior to this payment, there was a related party interest expense of \$715 during the three-month period ended March 31, 2023 associated with this note.

The Company leases office space from certain related parties on a month-to-month basis. \$2,000 per month is paid to NP Depot LLC, a company owned by the Company's president, John Swallow and approximately \$1,700 is paid quarterly to Mine Systems Design Inc which is partially owned by the Company's vice president, Grant Brackebusch. Payments under these short-term lease arrangements are included in general and administrative expenses on the Consolidated Statement of Operations and for the three-months ended March 31, 2024 and 2023 are as follows:

March 31,				
	2024	2023		
\$	7,620	\$	6,395	

#### 6. JV Arrangements

#### NJMJV Agreement

The Company owns 65% of the NJMJV and has significant influence in its operations. Thus, the JV is included in the consolidated financial statements along with presentation of the non-controlling interest. At March 31, 2024 and December 31, 2023, an account receivable existed with Crescent Silver, LLC ("Crescent"), the other JV participant, for \$1,598 and \$2,080, respectively, for shared operating costs as defined in the JV agreement.

#### Butte Highlands JV, LLC

On January 29, 2016, the Company purchased a 50% interest in Butte Highlands JV, LLC ("BHJV") for a total consideration of \$435,000. Highland Mining, LLC ("Highland") is the other 50% owner and manager of the JV. Under the agreement, Highland will fund all future project exploration and mine development costs. The agreement stipulates that Highland is manager of BHJV and will manage BHJV until such time as all mine development costs, less \$2 million are distributed to Highland out of the proceeds from future mine production. The Company has determined that because it does not currently have significant influence over the JV's activities, it accounts for its investment on a cost basis.

### 7. Earnings per Share

Net income per share is computed by dividing the net amount excluding net income (loss) attributable to a non-controlling interest by the weighted average number of common shares outstanding during the period. Diluted net income per share reflects the potential dilution that could occur from common shares issuable through stock options, warrants, and other convertible securities. Such common stock equivalents are included or excluded from the calculation of diluted net income per share for each period as follows:

	March 31, 2024 Three- Months	March 31, 2023 Three- Months
Incremental shares included in diluted net income per share		
Stock options	109,243	4,710
Stock purchase warrants	50,555	-
	159,798	4,710
Potentially dilutive shares excluded from diluted net income per share as inclusion would have an antidilutive effect:		
Stock options	-	358,953
Stock purchase warrants	-	289,294
		825,247

# 8. Property, Plant, and Equipment

In February 2024 the Company purchased the surface rights and subsequently cancelled the NSR from the previous agreement with the seller for a 169-acre parcel known as Butte Gulch adjacent to the Golden Chest. The Company had already owned the mineral rights to this property. The sale price was \$1,001,000 of which \$351,000 was paid in cash and the remaining \$650,000 is payable to the seller (monthly interest only payments of \$2,750 at 5% interest, for three years with a balloon payment of \$650,000 at the end of the term). For the three-month periods ended March 31, 2024 and 2023, interest expense was capitalized in association with the ramp access project at the Golden Chest as follows.

March 31, 2024	March 31, 2023
\$ 19,377	\$ 22,961

# 10. Investment in Buckskin

The investment in Buckskin is being accounted for using the equity method and resulted in recognition of equity income on the investment of \$1,867 and \$350 for the respective three-month periods ended March 31, 2024 and 2023. The Company makes an annual payment of \$12,000 to Buckskin per a mineral lease covering 218 acres of patented mining claims. As of March 31, 2024, the Company holds 37% of Buckskin's outstanding shares.

### ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### Plan of Operation

Idaho Strategic is a gold producer and critical minerals/rare earth element ("REE") exploration company focused on a diversified asset base and cash flows from operations. Its portfolio of mineral properties are located in the historic producing silver and gold districts of the Coeur d'Alene Mining region of north Idaho and the Elk City region of north-central Idaho, as well as the historic REE-Thorium Belt located near the city of Salmon in central Idaho.

The Company's plan of operation is to generate positive cash flow, increase its gold production and asset base over time while being mindful of corporate overhead. The Company's management is focused on utilizing its in-house technical and operating skills to build a portfolio of producing mines and milling operations with a focus on gold production and exploration for REEs.

The Company's gold properties include: the Golden Chest Mine (currently in production), and the New Jersey Mill (majority ownership interest), as well as the Eastern Star exploration property and other less advanced properties. The Company's primary focus as it relates to its gold properties is to continue to grow production at the Golden Chest Mine and look to reinvest the cash flow into both the Golden Chest, the New Jersey Mill, and furthering its exploration efforts near the Golden Chest, as well as at its REE properties.

In addition to its gold properties, Idaho Strategic has three REE exploration properties in Idaho known as Lemhi Pass, Diamond Creek, and Mineral Hill. Following observation of industry dynamics and in early response to events impacting long-term domestic critical mineral supply and demand trends, the Company's strategic expansion into REE's also aids in diversifying its holdings. The Company believes the anticipated demand for these elements in the electrification of motorized vehicles, defense spending, and a renewed focus on the United States' domestic critical mineral supply chain security may benefit domestic holders of such assets. The Company also believes it has a first-mover advantage with its addition of recognized REE land holdings in Idaho. To date, Idaho Strategic has conducted numerous exploration programs on its REE properties which include drilling, trenching, sampling, and mapping of certain areas within the Company's 19,090-acre landholdings.

Idaho Strategic has been able to demonstrate and utilize its track record of operations and experience in mining, milling, and exploring at the Golden Chest to develop relationships with different state government agencies, universities, national labs, and other government and non-government entities to advance its REE exploration activities on multiple fronts. Idaho Strategic plans to continue to look for additional partnerships to find mutually beneficial solutions to advance the U.S.' domestic REE supply chain.

### Critical Accounting Estimates

We have, besides our estimates of the amount of depreciation on our assets, two critical accounting estimates. The ounces of gold contained in our process and concentrate inventory is based on assays taken at the time the ore is processed and the ounces of gold contained in shipped concentrate which is based upon assays taken prior to shipment however subject to final assays at the refinery, these shipments are also subject to the fluctuation in gold prices between our shipment date and estimated and actual final settlement date. Also, the reclamation bond obligation on our balance sheet is based on an estimate of the fluture cost to recover and remediate our properties as required by our permits upon cessation of our operations and may differ when we cease operations.

Our concentrate sales sometimes involve variable consideration, as they can be subject to changes in metals prices between the time of shipment and their final settlement. However, we can reasonably estimate the transaction price for the concentrate sales at the time of shipment using forward prices for the estimated month of settlement, and previously recorded sales and accounts receivable are adjusted to estimated settlement metals prices until final settlement for financial reporting purposes. The embedded derivative contained in our concentrate sales is adjusted to fair value through earnings each period prior to final settlement. It is unlikely a significant reversal of revenue for the concentrate receivable will occur upon final settlement of the lots. As such, we use the expected value method to price the concentrate until the final settlement date occurs, at which time the final transaction price is known. At March 31, 2024, metals that had been sold but not finally settled included 5,737 ounces of which 4,421 ounces were sold at a predetermined price with the remaining 1,316 exposed to future price changes. The Company has received provisional payments on the sale of these ounces with the remaining amount due reflected in gold sales receivable.

The asset retirement obligation and asset on our balance sheet is based on an estimate of the future cost to recover and remediate our properties as required by our permits upon cessation of our operations and may differ when we cease operations. At March 31, 2024 we reviewed our December 31, 2023 estimate that the cost of the machine and man hours probable to be needed to put our properties in the condition required by our permits once we cease operations. The March 31, 2024 estimated costs would be \$104,000 for the Golden Chest property and \$224,000 for the New Jersey Mine and Mill. For purposes of the estimate, we evaluated the expected life in years and costs that, initially, are comparable to rates that we would incur at the present. An expected present value technique is used to estimate the fair value of the liability. This includes inflating the estimated costs in today's dollars using a reasonable inflation rate up to the date of expected retirement and discounting the inflated costs using a credit-adjusted risk-free rate. Upon initial recognition of the liability, the carrying amount of the related long-lived asset is increased by the same amount. The liability each year, and amortizing the asset over the estimated life, which decreases our net income in total each year. Changes resulting from revisions to the timing or amount of the original estimate of undiscounted cash flows are recognized as either an increase or a decrease in the carrying amount of the liability for an asset retirement obligation and the related asset. Upward revisions of the amount of undiscounted estimated cash flows are discounted using the current credit-adjusted risk-free rate. Downward revisions in the amount of undiscounted estimated cash flows are discounted using the credit-adjusted risk-free rate the original liability was recognized. The Company reviews, on an annual basis, unless otherwise deemed necessary, the asset retirement obligations. Separately, the Company accrues costs associated with environmental remediatio

# Table of Contents

# Highlights during the first quarter of 2024 include:

### **REE Exploration**

 Idaho Strategic's CEO and President, John Swallow, was invited by members from the U.S. Department of Energy to speak at the Future Needs for Responsible Mining of Critical Minerals workshop in Denver, CO on January 25<sup>th</sup> 2024.

### **Golden Chest/Operations**

- At the Golden Chest, ore mined from underground stopes totaled approximately 10,300 tonnes with all of the tonnage coming from H-Vein stopes. The 778 H-Vein stope mined during the quarter was a significant contributor to gold production as diluted vein samples taken during mining showed an average grade of 13.9 grams per tonne (gpt) gold for a total of 3,620 tonnes mined.
- A total of 3,050 cubic meters of cemented rockfill ("CRF") were placed during the quarter which is a quarterly record. The Main Access Ramp ("MAR") and associated drifts and raises were advanced by 100 meters during the quarter.
- For the quarter ended March 31, 2024, a total of 10,300 dry metric tonnes ("dmt") were processed at the Company's New Jersey mill with a flotation feed head grade of 10.31 gpt gold and gold recovery of 93.0%.

### **Results of Operations**

- Our financial performance during the quarter is summarized below:
- Revenue increased 76.5% to \$5,898,938 from \$3,341,596 for the three-month periods ended March 31, 2024 and 2023, respectively. The increase in revenue is largely due to the increased gold grade processed, as well as increased gold production throughout the quarter and a higher average gold price recognized on ounces sold. Gold production is expected to remain at approximately this level for the remainder of the year as mining on the H-Vein continues.
- Gross profit as a percentage of sales increased from 25.9% in the first quarter of 2023 to 48.1% in the first quarter of 2024. This increase is due to the increased gold grade and higher average gold price recognized on ounces sold.
- Operating income for the three-month period ended March 31, 2024, was \$2,141,973 which is an increase of \$2,128,950 from an operating income of \$13,023 in the first quarter of 2023. The increase is due to the increased revenue from gold production, while maintaining a stable cost structure.
- Other (income) expense decreased from income of \$31,163 in the first quarter of 2023, to income of \$13,841 in the first quarter of 2024. The decrease was mostly due to lower timber revenue in this reporting period compared to last, as well as an increase in interest expense between the two periods.
- Net income for the three-month period ended March 31, 2024 was \$2,155,814 compared to \$44,186 for the three-months ended March 31, 2023. Taking out losses from non-controlling interests, Idaho Strategic's net income was \$2,171,109 and \$60,599 for the first quarters of 2024 and 2023, respectively. This is a 35-fold increase year over year.
- The consolidated net income for the three-month period ended March 31, 2024 and 2023 included non-cash charges as follows: depreciation and amortization of \$501,788 (\$328,037 in 2023), loss on disposal of equipment of \$4,409 (\$6,120 in 2023), accretion of asset retirement obligation of \$4,575 (\$3,899 in 2023), and equity income on investment in Buckskin of \$1,867 (\$350 in 2023) and a loss on investment in equity securities of \$453, (\$0 in 2023).
- Cash cost and all-in sustaining cost per ounce decreased in 2024 compared to 2023 due to a higher ore grade mined. A core drilling exploration program is planned for the Golden Chest for starting in the second quarter of 2024 which will increase all-in sustaining costs for the remainder of the year.

# Cash Costs and All In Sustaining Costs ("AISC") Reconciliation to Generally Accepted Accounting Principles ("GAAP")

Reconciliation of cost of sales and other direct production costs and depreciation, depletion, and amortization (GAAP) to cash cost per ounce and AISC per ounce (non-GAAP).

The table below presents reconciliations between the most comparable GAAP measure of cost of sales and other direct production costs and depreciation, depletion, and amortization to the non-GAAP measures of cash cost per ounce and all in sustaining costs per ounce for the Company's gold production in the three-month periods ended March 31, 2024, and 2023.

Cash cost per ounce is an important operating measure that we utilize to measure operating performance. AISC per ounce is an important measure that we utilize to assess net cash flow after costs for pre-development, exploration, reclamation, and sustaining capital. Current GAAP measures used in the mining industry, such as cost of goods sold do not capture all of the expenditures incurred to discover, develop, and sustain gold production.

The Company is currently producing profitably from underground at the Golden Chest Mine. In the past, the Company has been successful in raising required capital from sale of common stock, forward gold contracts, and debt. As a result of its profitable production, equity sales and potential debt borrowings or restructurings, management believes cash flows from operations and existing cash are sufficient to conduct planned operations and meet contractual obligations for the next 12 months.

# PROMISSORY NOTE

### PROMISSORY NOTE (Secured by Mortgage)

#### \$650,000.00

### February, 7th, 2024

FOR VALUE received, IDAHO STRATEGIC RESOURCES, INC., an Idaho corporation, whose address is 201 N. 3<sup>rd</sup> Street, Coeur d'Alene, Idaho 83814 (the "**Maker**"), promises to pay to the order BELL RUN PROPERTIES, L.L.C., a Pennsylvania limited liability company, its successors and assigns (the "**Payee**"), the principal sum of <u>Six Hundred and Fifty Thousand and 00/100 Dollars (\$650,000.00</u>) with interest thereon to be paid at the rate of five (5.00%) per annum (the "Note"), to be paid as follows:

- A. Equal monthly interest-only payments in the amount of Two Thousand Seven Hundred and Fifty Dollars and 00/100 (\$2,750.00) each shall be paid on the first day of each calendar month starting on the month following the Date set forth above, with a first payment to be prorated as of the remaining calendar days in the month of execution. For example, if the Date of this Note is January 25, 2024, the prorated payment for January will be \$540.00 (\$90.00 per day multiplied by 6 days remaining in January). The equal monthly interest-only payment is intended to cover the interest accruing under this Note and the Maker's one-half of monthly service fees chargeable to Maker by the Escrow Agent as outlined below. Any remainder shall be applied to the principal sum due under the Note, as set forth herein.
- B. The entire balance of the principal sum, all unpaid interest thereon and all other amounts owed pursuant to this Note or the Mortgage (hereinafter defined), or otherwise in connection with this Note, including without limitation Late Charges (hereinafter defined), service fees and other charges, shall be due and payable three (3) years after the Date first set forth above (the "Maturity Date").

Maker understands and acknowledges that this payment schedule will not be fully amortized by the Maturity Date and that there will be a balloon payment due as of the Maturity Date for any unpaid amounts. If the entire balance of the principal sum, all unpaid interest thereon and all other amounts owed pursuant to this Note or the Mortgage are not paid in full by the Maturity Date, then the accrued and unpaid interest, Late Charges, service fees and other charges shall be added to the remaining principal balance of the Note (the sum of which will constitute the "New Principal Balance"), an interest rate of eight percent (8%) per annum shall be applied to the New Principal Balance until said balance has been paid in full, the Maturity Date of this Note shall be extended for an additional seven (7) years, and the Maker's monthly interest-only payment amount under this Note shall be adjusted to reflect a new monthly interest-only payment at the new interest rate on the New Principal Balance.

Payments on this Note shall be made to Flying S Title & Escrow as the long-term escrow agent (the "Escrow Agent") at 2 E. Mullan, Kellogg, Idaho 83837, or at any other address which Payee or the lawful holder of this Note may designate. All set-up fees and monthly charges associated with the long-term escrow shall be paid one-half ( $\frac{1}{2}$ ) by Maker and one-half ( $\frac{1}{2}$ ) by Payee. All payments to be made by Maker to Payee shall be deemed received by Payee only upon the actual receipt of the same by Payee, Escrow Agent or Payee's other designated agent.

This Note is secured by a Mortgage, of even date herewith, for the real property commonly known as the Butte Gulch Patented surface parcels, located in Shoshone, County, Idaho and more specifically described on **Exhibit A** attached hereto and incorporated herein by reference (referred to herein as the "**Mortgage**"). The terms of the Mortgage are hereby incorporated by reference as if fully set forth herein.

If a payment under this Note is not received by the tenth (10th) day after the date on which it was due, Maker shall pay to Payee an amount equal to the greater of five percent (5%) of the unpaid portion of the regularly scheduled payment or \$50.00 (the "Late Charge").

All payments received shall be applied first to any sums due hereunder other than the principal balance of this Note, then to accrued and unpaid interest, if any, then to Late Charges, if any, and then the balance, if any, to the reduction of the outstanding principal balance of this Note.

Maker shall have the right to prepay this Note in whole or part, from time to time, without penalty.

### An "Event of Default" shall occur if:

(a) Maker fails to make the full and punctual payment of any amount payable hereunder or under the Mortgage; or

(b) Maker sells or transfer the property described in the Mortgage securing this Note, or any part thereof or any interest therein, without the Payee's prior written consent and except as otherwise provided in the Mortgage; or

(c) Any breach or default has occurred under this Note or the Mortgage.

Upon the occurrence of an Event of Default, the principal sum of this Note, all accrued interest and all other sums due under this Note and the Mortgage, shall become immediately due and payable at the option of Payee, without notice. The failure to assert this right shall not be deemed a waiver.

The obligations and liabilities of each Maker shall be joint and several and shall be binding upon and enforceable against each Maker and their respective successors and assigns. Maker waives presentment, notice of dishonor and protest of this Note. In case any legal action is required to collect this Note, to enforce the Mortgage, or any part thereof, Maker promises to pay, in addition to costs and disbursements provided by statute, such additional sums as the Payee of this Note may incur in costs, expenses and reasonable attorney's fees, whether incurred prior to, during or subsequent to the filing of any such legal action.

If any clause or provision herein operate or would prospectively operate to invalidate this Note, then such clauses or provisions only shall be held for naught, as though not herein contained and the remainder of this Note shall remain operative and in full force and effect.

This Note shall be governed by and construed in accordance with the laws of the State of Idaho and, if controlling, the laws of the United States and shall be binding upon Maker, its heirs, successors and assigns and shall inure to the benefit of the Payee, its successors and assigns. Venue for enforcement of any action shall lie in the State Courts of Idaho, District of Shoshone County.

IN WITNESS WHEREOF, Maker has executed this Note as of the day set forth below.

### Mine Safety Disclosures

Our mines are operated subject to the regulation of the Federal Mine Safety and Health Administration ("MSHA"), under the Federal Mine Safety and Health Act of 1977 (the "Mine Act"). In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") was signed into law, and amended in December 2011. When MSHA believes a violation of the Mine Act has occurred, it may issue a citation for such violation, including a civil penalty or fine, and the mine operator must abate the alleged violation.

As required by the reporting requirements of the Dodd-Frank Act, as amended, the table below presents the following information for the quarter ended March 31, 2024.
